English: Fluent

Hobbies

- Reading
- Table-Tennis
- Fishing

Education

Bachelor of Computer Science:
Computer Engineering - 2013
University of Novi Sad

Summary

Experienced blockchain developer adept at designing, implementing, and maintaining decentralized applications (DApps) and smart contracts on EVM, Sui, Solana, Tron and TON using AI. Proficient in utilizing blockchain and AI technologies to streamline processes, enhance security, and facilitate transparent transactions. Skilled in programming languages such as Solidity, Rust, FunC, Move, Java Script, and Python, with a strong foundation in cryptographic principles and distributed systems. Proven ability to collaborate with cross-functional teams to deliver innovative solutions aligned with business objectives. Continuously staying updated with the latest advancements in blockchain technology to drive continuous improvement and optimize performance.

Skills

- | | |
|--------------|-----------|
| • AI | • Web3.js |
| • TypeScript | • Move |
| • Solidity | • Node.js |
| • Rust | • FunC |
| • Python | |

Experience

Blockchain Developer - 06/2020 to 10/2024

Blockchain & AI Developer - 11/2024 to 01/2025

Blockchain Development, Antier

- Spearheaded the development and implementation of smart contracts using Solidity on the Ethereum blockchain platform, ensuring secure and efficient transaction processing.
- Built Smart Contracts on Sui using Move
- Built Smart Contracts on Solana using Rust
- Built Smart Contracts and Telegram mini apps on Ton blockchain using FunC
- Built Dex and Cex bots using Javascript and Python
- Collaborated with a cross-functional team to design and deploy decentralized applications (DApps) for various use cases, including supply chain management and identity verification.
- Built AI Agent like Virtuals.io and Daos.fun.
- Conducted comprehensive testing and debugging of blockchain applications to identify and resolve vulnerabilities, enhancing overall system reliability.

Key Achievements

- Successfully deployed a decentralized supply chain management solution, reducing operational costs by 20% and improving transparency and traceability across the supply chain.
- Implemented security enhancements to smart contracts, mitigating potential security threats and ensuring compliance with industry standards and regulations.
- Played a pivotal role in securing partnerships with key industry players, expanding the company's presence in the blockchain ecosystem and driving revenue growth.
